

Job Title: Senior Quality Engineer
Number Of Vacancies- 4
Company Name- J4C Projects Private Limited
Location- Mumbai, Sakinaka, India
Department: Quality Assurance / Quality Control (QA/QC)
Reports To: Project Manager and Client
Salary- Best In Industry

Job Summary:

The Senior Quality Engineer is responsible for ensuring that all construction projects adhere to the highest quality standards in compliance with applicable codes, client specifications, and regulatory requirements. The role involves planning, implementing, and monitoring quality assurance processes, conducting inspections, and maintaining quality documentation throughout the project lifecycle.

Key Responsibilities:

1- Quality Assurance & Control

- a- Develop and implement project-specific quality plans, inspection test plans (ITPs), and quality procedures. Conduct inspections and audits of construction activities, materials, and equipment to ensure compliance with design specifications and industry standards.
- b- Identify quality issues and collaborate with the project team to implement corrective and preventive actions.
- c- Review and approve material submittals, test reports, and shop drawings.

2- Regulatory Compliance

- a- Ensure construction processes meet local and international construction standards such as IS codes, ISO standards, and client requirements.
- b- Liaise with third-party inspectors, clients, and regulatory bodies for quality-related matters.

3- Documentation & Reporting

- a- Maintain accurate and up-to-date records of quality tests, audits, and inspections.
- b- Prepare and submit quality reports, including non-conformance reports (NCRs), root cause analysis (RCA), and quality control summaries.
- c- Oversee proper documentation and filing of material certificates, test results, and other QA/QC documents.

4-Team Leadership

- a- Guide and train junior engineers, supervisors, and site personnel on quality standards and best practices.
- b- Lead quality review meetings and provide inputs to enhance overall project quality.

Qualifications:

Educational Background

Bachelor's degree in Civil Engineering, Construction Management, or a related field. A postgraduate degree or certification in Quality Management is a plus.

Experience

Minimum of 8–12 years of experience in quality assurance/control in the construction industry, with at least 3 years in a senior role. Proven experience in large-scale construction projects such as residential, commercial, or infrastructure developments.

Skills and Competencies

Strong knowledge of quality standards and testing methods (IS Codes, ISO 9001, etc.).

Proficiency in quality management tools and software.

Analytical and problem-solving skills with a keen eye for detail.

Strong leadership and communication skills to effectively manage teams and interact with stakeholders.

Ability to manage multiple tasks and deadlines in a dynamic environment.

Certifications

Certification in quality management systems (e.g., ISO 9001:2015 Lead Auditor, Six Sigma) is preferred.

Knowledge of safety standards like OSHA or ISO 45001 is an added advantage.

Key Performance Indicators (KPIs):

Percentage of project milestones achieved with zero quality defects.

Reduction in non-conformance reports (NCRs).

Compliance rate with quality audits and inspections.

Timely resolution of quality issues.
